

PRISMBEAM²⁴

24
VDC

PRISM

Pre-assembled, stick-based LED illumination
for new & retrofit sign cabinet applications

Specifications

Dimensions W × H..... Single-sided.....0.5" × 0.89"
Double-sided.....0.5" × 1.27"

Efficacy.....165 lm/W

Color temp. (nominal).....6500 K

Optimum cabinet depth..... Single-sided.....5-8"
Double-sided.....10-16"

Operating temp.-40° C to +60° C

Protection classIP66 & IP68*

BinningMacAdam Ellipse 3-Step (whites)

Fastening.....Mounts to existing lampholders
or PrismBEAM²⁴ brackets

Life rating.....>60,000 hours

Warranty.....10-Year Product / Labor

* PrismBEAM²⁴ IP68 test parameters are 1.3 m submersion for 30 minutes. Do not mount in submerged application or where module will be directly exposed to prolonged flowing or dripping water.

Density Guidelines

Model	Module color	Can Depth	Inches on center
PrismBEAM ²⁴ Single-sided	6500 K	4-5"	8"
		5-10"	12"
		10-12"	18"
PrismBEAM ²⁴ Double-sided	6500 K	8-10"	8"
		10-20"	12"
		20-24"	18"

Notes:

- 1) To minimize the potential for shadows/hot spots in applications when using frame support tubes/poles; mount modules or frame support tubes such that the tubes are centered in between modules and at a depth that will not directly interfere with the beam angle of the LEDs. Use SignComp Adjustable Frame Brace (P/N: 5357) or equivalent.
- 2) It is recommended that you first test the LED density in a sample cabinet to evaluate brightness, uniformity, and color.
- 3) Should you have questions or require assistance in testing, please contact your Principal Sloan customer service representative.
- 4) Products can be used in can depths deeper or shallower than listed above, but testing is recommended.

These guidelines are intended to provide only an approximation of PrismBEAM²⁴ product required for your cabinet, assuming an optimal balance of performance and cost. Principal Sloan is not responsible for the actual results based on the use of these guidelines. All spacing guidelines in this chart were done using 7328 White Acrylic faces. Other materials, thicknesses, and color can affect these guidelines in your sign. To ensure accuracy, it is recommended that you test the product in your specific application in a dark setting prior to installation. If you have concerns or questions about the materials you are using for your application please contact us for assistance.
